

BGI114H

Manual chip implanting equipment/2 heating heads

Product description

The BGI114H is a small desktop manual machine. The equipment realises insertion of the chip onto the card. Some productions need pre-heating of the chip and/or glue. This solution allows to mix pre-heating and standard heating.

Advantages

- used for standard production, small and medium runs
- throughput of up to 500 units per hour depending on configuration
- compact and easy to use
