

BGI118

Automatic chip implanting equipment

Card manufacturing equipments

Product description

The BGI118 is an automatic equipment. It realises the punching of reels of chips and the insertion of the chip onto the card.

Advantages

- stock of up to 500 cards
- used for reels of chips
- used for standard production, medium runs and bigger production
- throughput of up to 1500 units per hour depending on configuration
- suitable for thicker cards (ex : **Plug-up** card production)
- can be supplied with optional chip programming and camera
- suitable for dual interface chip implanting using vertical conductive hotmelt glue
- easy to use thanks to a screen touch interface

Technical specifications

DIMENSIONS			
Length	Width	Height	Weight
1330 mm	700 mm	1650 mm	200 kg
TEMPERATURE			
Operating		Storage	
+5°C to +50°C		-20°C to +60°C	
ELECTRICAL CHARACTERISTICS			
Power : 240V AC ; Frequency : 50-60Hz single phase ; Intensity : 3,15A			
PNEUMATIC CHARACTERISTICS			
6 bars			
IN CONFORMITY WITH CE DIRECTIVES			

Markets

Banking, GSM, Telecom, e-ID card, health card, prepaid card, gift card, loyalty card, Plug-up ...
